Do you think that the layout for various NLP websites are intuitive and easy to use?

No

Textbox and other components can be aligned better.

There are some features on the website that dont seem to work such as the annotation tool. Not sure what the << <

> >> buttons on the right hand corner do either

Semi easy to use. but the UI is a little bit clunky.

Yes but no one likes to login all the time.

Do you feel that the visualization of the dependency-based parsed tree is neat, accurate, and easily understood?
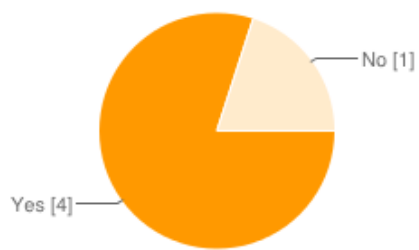

Yes but thats because I have basic knowledge of NLP. A key for the labels would be very useful

yes

Absolutely.

Yes it is.

The tree is pretty accurate, but I wish it can be more dynamic and interactive.

Would you purchase a premium membership to use these features?

Yes	**0**	0%
No	**5**	100%

No [5] — — Yes [0]

Do you feel the need of a complete tutorial on how to use the dependency-based parse tree?

Yes [4]

No [1]
